What License to choose?
It should be scary.....

I want it simple and permissive.

I'm concerned about patents.

I care about sharing improvements.

MIT  Apache  GPL

Don’t dream big. Just have fun ....

Most good programmers do programming not because they expect to get paid or get adulation by the public, but because it is fun to program.

How fast Linux change?
Every good work of software starts by scratching a developer's personal itch.

Good programmers know what to write. Great ones know what to rewrite (and reuse).

If you treat your beta-testers as if they're your most valuable resource, they will respond by becoming your most valuable resource.

The next best thing to having good ideas is recognizing good ideas from your users. Sometimes the latter is better.
